Please indicate the required specifications in the table.
The pelvic middle (c) and the shoulder height (d) are essential.

In case of missing specifications, we apply standard measures!
When measurements deviate from the sizes specified for this stander (compare to table below), we customise the stander at your expense.

Figure does not comply with base model
Size tolerances $\pm 3\%$

Patient's muscle tone

Stereotypic movements
(e.g. permanent body rocking)*

*Please check whether any customisations, such as reinforcements of the base frame, are required due to stereotypical behaviour! Requirements can be specified under "Notes" on the last page!

Special accessories

Angled mounting for removable lateral supports

A technical line drawing of a metal bracket. It has a rectangular base plate with a vertical flange on one side. A long, narrow, angled support arm is attached to the base plate, extending outwards and downwards. The drawing shows the bracket from a perspective view, highlighting its L-shaped profile and the angled support arm.
